## SKILLS

### PLATFORMS & SYSTEMS

Shopify (Partner), Magento 2, NetSuite ERP, Alumio, Klaviyo, Mirakl, GA4 and Google Merchant Center.

### PRODUCT & CONTENT

Product data management, metafields configuration, SEO best practices, product copywriting, size and care guide creation, collection management, search analytics, conversion optimisation.

### TECHNICAL

HTML, CSS, JavaScript, Node.js, SvelteKit, Hugo, REST APIs, Cloudflare Workers, GitHub Actions, Docker, QA/UAT.

### COMMERCIAL & OPERATIONAL

Google Ads, SEO, email marketing, D2C growth, reporting, data analysis, project coordination, cross-team stakeholder management and supplier management.

## ADDITIONAL

### TECHNICAL INTERESTS

Engineering, CAD, 3D printing, electronics and hands-on design/build projects. This gives me a practical, systems-led mindset that carries across into my digital work.

## EDUCATION

### Digital Design BSc (Hons) · 2:1

Brunel University London  
2014 – 2018 · Industrial Placement Year

### A-Levels & GCSEs

Borden Grammar School  
2007 – 2014

## Profile

eCommerce specialist with a hands-on background across product data management, Shopify platform operations, digital systems and website development. My experience spans both the commercial and technical side of eCommerce, from owning end-to-end product launches and managing structured data in Shopify through to building internal tools, writing HTML and CSS, and growing D2C sales. I bring a detail-oriented, analytical approach to product content, ensuring accuracy, discoverability and a consistent customer experience, alongside the technical fluency to configure systems, improve processes and use AI tools to work more efficiently.

## Experience

### Freelance eCommerce Specialist

Self-employed

MAR 2026 – PRESENT  
Remote

- Working independently across a small number of clients covering eCommerce consultancy, integration support and technical problem solving.
- Contracted by Frog Bikes post-administration to independently diagnose and resolve a critical integration breakage across a NetSuite, Alumio and Magento 2 stack, writing and modifying RESTlets, debugging across multiple integration layers and restoring business-critical order and inventory flows without development partner support.
- Supporting additional clients across eCommerce strategy, platform operations and digital systems, drawing on broad cross-platform experience.

### eCommerce Manager

Frog Bikes

OCT 2022 – FEB 2026  
Ascot, UK · 3 yrs 5 mos

- Owned product data accuracy and consistency across the full catalogue, managing structured product information including specifications, sizing, care, descriptions and pricing to ensure correct front-end display and a seamless customer experience.
- Scoped and led the technical planning for a Shopify re-platforming project as a certified Shopify Partner, defining metafield structures, data architecture, integration routes and platform configuration before the business entered administration.
- Owned the full technical stack for Frog Bikes' ecommerce operation, acting as lead across front-end development, backend integration, ERP connectivity and architecture planning, working with and managing an external development partner across all layers.
- Led the architecture and delivery of the platform migration to Magento 2, including building a bespoke integration layer connecting NetSuite ERP, Magento 2 and Alumio middleware, defining API contracts, data formats, endpoint structures and integration logic.
- Built and deployed custom sites, microsites and content-rich landing pages using SvelteKit and Hugo, written directly in HTML and CSS, statically generated and served via Cloudflare Workers.
- Developed internal tools and automation scripts to improve operational efficiency, including bulk product data tooling with interactive GUIs and AI-assisted workflows to streamline content creation and data management.
- Used GA4, search analytics and performance data to analyse product and collection performance, providing actionable insights and driving conversion optimisation, UX improvements and A/B testing.
- Drove significant D2C revenue growth, scaling monthly sales from around 20 bikes to a peak of 900, with email database growth from approximately 22,000 to 40,000 subscribers.

### Digital Operations Manager

Union of Brunel Students

JAN 2020 – AUG 2022  
Uxbridge, UK

- Managed and improved digital and administrative operations across multiple venues, including EPOS, stock control and reporting processes.
- Built internal tools and reporting processes to improve visibility and day-to-day operational control.

### Digital Marketing Coordinator

Union of Brunel Students

OCT 2018 – NOV 2019  
Uxbridge, UK · Alongside degree

- Managed website content, digital assets and communications in a blended digital and events role, supporting campaigns and events across the Students' Union.

### Marketing Executive

DLL — De Lage Landen / Rabobank Group

SEP 2016 – SEP 2017  
Watford, UK · Placement Year

- Year-long placement covering email, CRM, campaigns and lead generation within a large corporate environment, building early experience in structured project coordination and stakeholder management.

### Web & Digital Marketing Assistant

Easy Networking Solutions

DEC 2013 – AUG 2014  
Kent, UK – Remote

- Managed website content and supported digital marketing activity including Facebook Ads and Google Ads for a hosting and server business.
